

[READ THE MHRN SPRING 2018 NEWSLETTER!](#)

New MHRN Findings

- Does Patient Adherence to Antidepressant Medication Actually Vary Between Physicians?
- What are the odds of racial and ethnic minority patients returning for a second psychotherapy visit within 45 days of the initial session?
- MHRN study examines what general risk factors are associated with suicide by firearm, compared with other methods
- People diagnosed with psychotic disorders have a higher risk of unnatural death, but is the risk even higher shortly after they're diagnosed?
- What types of care pathways do patients take before first being diagnosed with psychotic symptoms?

Project News

- Lessons Learned from the Safer Use of Antipsychotics for Youth (SUAY) Pilot Study

MHRN-Related Job Opportunities

- Department of Research & Evaluation at Kaiser Permanente Southern California seeks Mental Health Research Scientist
